

CREDIT RECOVERY

Students that retake classes to replace a failing grade or to improve a grade must take it in the same circumstance as the original class for the 'F' or other grade to be removed from their grade point average (example: English 10 semester 2 needs to be taken in a BVHS classroom where all of the students are taking English 10 and a semester test would be required since this is a sophomore level course). All classes taken off campus or through the internet must be preapproved by the high school administration. These classes, whether taken during the school year or the summer may meet graduation requirements but previous grades will remain as a part of a student's grade point average.

Summer school classes count toward the 2nd semester grades of the previous academic school year. Any class completed prior to July 31st would go on the student's previous semester transcript.
