COMPUTER USAGE POLICY

Purpose of this Document:

The Brandon Valley School District provides Information Technology services for the student body and faculty. We are pleased to bring the following services to the district and believe that they offer a vast, diverse, and unique set of opportunities to both students and teachers. These services include Internet services, web hosting, e-mail services, and other related services provided via the computer network. The district has made a substantial investment in human and financial resources to create and maintain these systems. State law requires each district to have a written policy in place concerning the proper use of Information Technology within the classroom, which this document outlines.

With access to computers and people all over the world also comes the availability of material that may not be considered to be of educational value in the context of the school setting. However, it is the school district's belief that the valuable information and interaction on these networks far outweigh the possibility that the user may locate material that is not consistent with the educational goals of the district. Internet users, like traditional library users, are responsible for their actions in accessing online resources. In addition, the smooth operation of the network relies upon the proper conduct of the end users. These guidelines are provided here so that you are aware of the responsibilities you as an end user are about to acquire. In general this requires efficient, ethical, and legal utilization of the network. If a user violates any of these provisions, he/she will be subject to the penalties listed in this document. The signature(s) at the end of this document is (are) binding and indicates the party (parties) who signed has (have) read the terms and conditions carefully and understand(s) their significance.
